Report Highlights:

This report presents revised production data for 2008/9, 2009/10 and 2010/11 as well as a revised series on the Feed and Residual and Food, Seed and Industrial Use components of consumption which Post believes more accurately reflect the situation on both factors.

General Information:

Post obtained updated data on Egyptian wheat production and also revised the 2010/11 forecast based on new information. Post has also revised our data on Feed and Residual, based on recent survey data on on-farm feed use and a better understanding of the sizeable disappearance in the marketing chain from farm or port to bakery. Post also revised the Food, Seed and Industrial Use data to better reflect actual food consumption patterns.
