### FAIRS Certificate Report

**Report Categories:**

FAIRS Subject Report

**Approved By:**

Michael Henney, Agricultural Attaché

**Prepared By:**

Pawel Flakiewicz, Intern;

Jolanta Figurska, Piotr Rucinski, Agricultural Specialists

**Report Highlights:**

Poland as a member of the European Union (EU) applies EU regulatory requirements for import of products of animal or plant origin. The EU has harmonized export certification requirements for most products. The few products not yet EU harmonized are subject to Polish national rules. The competent Polish authority would need to be approached on a case-by-case basis to address requirements for non-harmonized products.

The EU requires products be accompanied by a sanitary-phytosanitary certificate at port of arrival. A matrix for many required certificates specific for Poland is appended to this report.

This report should be read in conjunction with the EU-27 - Food and Agricultural Import Regulations and Standards - Certification available via [www.fas.usda.gov](http://www.fas.usda.gov) - Attaché Reports link.

## **General Information:**

### **I. List of Required Export Certificates**

**European Union (EU)** legislation calls for many health and supervisory requirements that are meant to guarantee that imports meet the standards of production in Member States.

The EU has established harmonized import requirements for animals and animal products applicable for any Member State. The EU recognizes the U.S. as eligible to export all animal products to it. For several products, the EU requires export establishments be pre-approved based on submissions made by U.S. government. U.S. government agencies involved in defining EU eligible export establishments are: the Food Safety and Inspection Service (FSIS), the Animal and Plant Health Inspection Service (APHIS), the Agricultural Marketing Service (AMS), and the Food and Drug Administration (FDA). Approved establishments may be subject to EU inspection. Lists of EU-approved animal and animal product establishments are available on the USEU website at:

<http://www.usda-eu.org/trade-with-the-eu/eu-import-rules/certification/approved-u-s-establishments/>.  
The EU requires the animal or public health certificate accompany each shipment and be signed and dated prior to shipment. The competent U.S. certifying agent will delete any statement appearing on the EU model certificate that is not applicable.

The EU imposes a number of general requirements for all veterinary health certificates. Directive 2002/99/EC; Annex IV.6, stipulates that certificates must be issued before the consignments to which they relate leave the control of the competent authority. Non-adherence to requirements of this directive will lead to rejection of shipment at EU border entry point. For that reason, U.S. regulatory agencies which issue veterinary health certificates (FSIS, APHIS and AMS) include this guidance specifically in their export libraries.

**Imports of Eggs and Egg products** - Poland does not recognize certification by either USDA's Food Safety and Inspection Service (FSIS) or Agricultural Marketing Service (AMS) of U.S. facilities as eligible for export of eggs for processing or processed to the European Union. Polish law requires in absence of formal recognition by European Commission regulation or EU law, third country meat and egg related facility eligibility must be established by the General Veterinary Inspectorate prior to export (per Article 24 of the Polish Law on Products of Animal Origin (Polish Law Paper 2006 No 17 position 127 with amendments, dated December 16, 2005). The absence of EU law/regulation recognizing U.S. meat and egg suppliers as eligible to export to European Union and the lack of the General Veterinary Inspectorate recognition of U.S. facility prevents access to this market which had experienced a sharp spike in market prices in 2012 when Class A, Class B and further processed eggs were all in short supply.

The EU has harmonized import requirements for plants and plant products as well.

Harmonized requirements are published in a single directive. Unlike veterinary products, the EU employs only one model certificate for all plants and plant products.

This is consistent with international guidance as laid out by the International Plant Protection Convention of the Food and Agriculture Organization of the United Nations (<http://www.ippc.int/IPP/En/default.htm>). For the U.S., the APHIS issues the required phytosanitary certificate with the requisite attestations to specific requirements of the EU.

EU certification requirements for some products may be partially or not harmonized. For such products rules of the individual Member State would apply. The import agent should have some guidance to provide on the Member State requirement for that product. If not, request guidance on current requirements from the U.S. Embassy's Agricultural Office. Note: U.S. regulatory agencies that issue export certificates usually identify a Member State's specific requirements in their export libraries and guides.

As a member of the European Union Poland applies EU export certification requirements for products imported. Required certificate details are set out in specific legislation, including veterinary health certificate models to be used (links included at the end of this report). The European Union, including Poland, does not specify a list of eligible plants or third country from which certain products are permitted import from. Examples of such non-standard products include: meat of crocodiles, ants in sugar.

## **II. Purpose of the Export Certificates**

Poland, as a member of the EU, conforms to all EU regulations and directives. Therefore, it is recommended that this report be read in conjunction with the EU Certification Guide, GAIN Report E60015, date 3/23/2011, available at: [EU FAIRS Export Certificate Report](#), and Food and Agricultural Import Regulations and Standards Report 2012, GAIN available at: [EU 27 FAIRS REPORT 2012](#)

Both reports are consolidated EU-27 requirements published by the US Mission to the EU in Brussels, Belgium. These reports plus country specific reports can be accessed through the FAS website: <http://gain.fas.usda.gov/Pages/Default.aspx> link.

Poland's State Veterinary Inspection (Główny Inspektorat Weterynarii) controls imports of products from third countries. Contact information follows:

State Veterinary Inspection  
Main Inspectorate  
30 Wspólna St.  
00-930 Warszawa, Poland  
Tel. +48 22 623 20 89  
Fax: +48 22 623 14 08  
Email: [wet@wetgiw.gov.pl](mailto:wet@wetgiw.gov.pl)

## **III. Specific Attestation Required on the Export Certificate**

For the identity check of the shipment, the State Veterinary Inspection requires the seal number of the container be printed on the veterinary certificate. A seal number on the Bill of Lading is not sufficient as these can be easily re-issued by private companies. If no seal number is present on the certificate, a physical check is necessary to verify the identity of the shipment.

For some veterinary certificates, additional statements (declaration of BSE / TSE) are now included.

Community legislation recently published notes this language is part of the model veterinary health certificate now.

#### **IV. Government Certificate Legal Entry Requirements**

According to the regulation of August 27th, 2003 on veterinary border inspection (Polish Journal of Law 2003, no. 165, pos. 1590), product may be imported if:

1. It contains the original veterinary certificate drawn up in at least one of the official languages of the border inspection and the country of final destination issued by the competent authority of the country of origin
2. It is labeled in a way that can be identified
3. It comes from the lists published by the European Commission (in the case of products for which import requirements are specified in the EU regulations):
  - a. list of third countries or their parts
  - b. list of institutions authorized to introduce the products into the EU

Veterinary border checks of consignments imported into the Poland is conducted by the General Veterinary Inspector, in accordance with the Law of 29 January 2004 (Polish Journal of Law 2004 No. 33. pos.287).

#### **V. Other Certification or Accreditation Requirement**

In accordance with Article 24, 2nd Act, from December 16, 2005 on products of animal origin (Polish Journal of Law 2006, No. 17, pos. 127) General Veterinary Inspector is proper, competent authority in a matter of settlements of veterinary requirements with a third country. Those specifications must be executed in import from third countries, in extent not specified by the EU regulations.

#### **Appendix I. Electronic Copy or Outline of Each Export Certificate:**
