Grain and Feed Update

Greater Exports of U.S. Rice to Korea

Approved By:

Ron Verdonk

Prepared By:

Sunchul Choi//Amanda F. Hinkle

Report Highlights:

Under the 2018 Tariff Rate Quota (TRQ), Korea purchased a total of 408,700 metric tons (MT) of rice (milled basis) from four countries, including the United States, China, Thailand, and Vietnam. The U.S. share reached 38.7 percent, up 4.8 percentage points from 2017. The pace of auctions in Korea continues to be slow. Korean rice exports sharply increased in 2018 to 64,164 MT, owing to donations of 60,000 MT. Consumption is adjusted down to 4.44 million MT (MMT) in this report to reflect changes in the Korean government's assessment of lowered values of "other and loss" and "actual consumption of feed."

Commodities: Rice, Milled

Production:

Production remains unchanged from the previous report ([KS1844](#)). With a continuation of high government production support prices expected, a marked change in rice output is unlikely.

Consumption:

The Korean government has revised downwards total rice consumption in MY 2016/17 to 4.44 MMT as they adjusted the “other and loss” account down to 0.12 MMT from 0.25 MMT. They also lowered “actual consumption of feed” to 0.38 MMT from 0.47 MMT. Other categories remain unchanged from the previous report.

Note: actual rice consumption for feed is slightly different from government's estimate of feed use

Trade:

Although the previous arrangement requiring Korea to provide U.S. rice producers with a country-specific quota expired at the end of 2014, Korea has continued to import the mandatory import volume of 408,700 MT (milled) from Most Favored Nation (MFN) countries at the current duty level of five percent under the tariff rate quota (TRQ) regime. As of January 7, 2019, Korea completed purchasing under the 2018 MFN TRQ: 221,305 MT of which was delivered in the second half of CY 2018 (June-December) on a contracts basis and 187,395 MT of which is scheduled to be delivered in the first half of CY 2019 (January-June) also on the basis of contractual terms (Table 10).

2018 TRQ Tendering Results:

The Korea Agro-Fisheries and Food Trade Corporation (aT) completed the tendering process for 2018 rice TRQ commitments on January 7, 2019. Korea purchased 408,700 MT of rice (milled basis) from four countries: The United States, China, Thailand, and Vietnam. The U.S. share reached 38.7 percent, up 4.8 percentage points from 2017, due to relatively more competitive pricing than other countries, and a greater demand for medium grain variety rice (Table 6). Contracts for U.S. rice totaled 158,163 MT (milled), worth USD 151.9 million. Of this total, 134,625 MT was brown rice (equivalent to 121,163 MT on a milled basis) used for food processing, and the remaining 37,000 MT was milled rice for table use (Table 5).

Under the 2018 rice TRQ, the Korean government purchased 39,800 MT of USDA # 1 grade milled rice for table use, down 200 MT from the previous year. This total consisted of 37,000 MT of medium grain rice from the United States and 2,800 MT of long grain rice from Vietnam. Korean domestic political circles continued pressing the Korean government to reduce the quantity of table rice imports under the TRQ regime, blaming imported table rice for further disruption of domestic rice farm gate prices and for the currently large rice stocks.

The average contracted price for U.S. #1 medium grain table rice was USD 965.91/MT, CIF, up 17 percent from the previous year. Meanwhile, Vietnamese #1 long grain table rice was contracted at USD 513.80/MT, CIF, up five percent from the previous year.

Auctions for Imported Table Rice:

Korea Agro-Fisheries & Food Trade Corporation (aT) sells table rice shipments to wholesalers/middlemen for HRI use and to consumers through a public auction system. Meanwhile, the Ministry of Agriculture, Food and Rural Affairs (MAFRA) distributes processing rice to end-users, such as food processors and alcoholic beverage producers, at a set price throughout the year.

Due to heavy stocks of domestic rice caused by consistent overproduction since 2013, the pace of auctions for imported rice for table use has been very slow, effectively reducing the volume of auctioned rice. As large rice stocks have led to low domestic prices, farmers' groups have petitioned the government to slow down auctions for imported rice for table use, and during the harvest season they have asked the government to stop conducting auctions for imported medium and short grains, which have competed with domestic short grain rice.

Accordingly, the Korean government has suspended auctions for medium and short grain rice imported under the 2016 TRQ regime for table purposes since September 24, 2018 to prop up domestic rice prices during the harvest period. However, selling auctions for long grain rice imported under the 2016 TRQ have been completed (Table 13), and selling auctions for long grains imported under the 2017 TRQ began in early January 2019 (Table 14). As of January 23, 2019, aT began auctioning U.S. medium grain rice imported under the 2017 TRQ (despite not having auctioned all of the 2016 TRQ medium grain rice).

2/ to be imported in the first half of 2019

3/ imported in December 2018, sitting in the warehouse

Exports:

Korea's rice exports were 64,164 MT in 2018. This number sharply increased from 2017 due to a rice donation of 60,000 MT, which includes a 50,000 MT donation to Yemen, Ethiopia, Kenya and Uganda through the World Food Program (WFP) under the Food Assistance Convention (FAC), and a 10,000 MT donation to Vietnam under the ASEAN Plus Three Emergency Rice Reserve (APTERR).

a/ includes 60,000 MT of food assistance in 2018.

Food Assistance Convention (FAC)

After joining the Food Assistance Convention (FAC) in early 2018, Korea plans to donate 50,000 MT of domestic rice (milled basis) to developing countries through the World Food Program (WFP) in 2019. In 2018, Korea donated 50,000 MT of domestic rice (milled basis) as stated in the preceding section: 17,000 MT to Yemen, 15,000 MT to Ethiopia, 13,000 MT to Kenya and 5,000 MT to Uganda, all through the WFP.

Stocks:

The MY 2018/19 ending stocks forecast (as of the end of October 2019) is revised up to 975 thousand MT (TMT) from the previous 762 TMT, or 20.9 percent of total consumption due to lower consumption of rice caused by the reduced estimate of other and loss account in MY 2016/17. Accordingly, MY 2017/18 ending stocks (as of the end of October 2018) are increased up to 1.42 million MT (MMT) from the previous estimate of 1.21 MMT. MY2016/17 ending stocks reached two MMT, up 12 percent from the previous estimate.
