Rice export prices increased around 1 percent from the previous week due mainly to appreciation of the Thai baht which strengthened to 31.5 baht/U.S. \$1.00 from the previous week's exchange rate of 31.7 baht/U.S. \$1.00. Thai rice exporters raised their quotations to cover the higher exchange rate risk as the Thai baht was volatile over the past week even though domestic rice prices remained stable.

Note on data: Export figures since March 22, 2002, do not include fragrant rice. In addition, during May 1, 2013 - December 18, 2016, export data did not include 25% - 100% grade white rice exports as the reporting authority was moved from the Thai Board of Trade to the Ministry of Commerce's Office of Commodity Standards, which does not release official export data. FAS/BKK reports only the official export numbers available from the Board of Trade of Thailand. The reader should bear in mind these differences when comparing historical data with current data.
