### Rules for Allocation of Subsidies for Purebred Livestock Breeding

**Report Categories:**

Agricultural Situation

Livestock and Products

Agriculture in the Economy

Policy and Program Announcements

**Approved By:**

Christopher Riker

**Prepared By:**

Staff

**Report Highlights:**

The Russian government's "Rules for the Allocation and Distribution of Subsidies from the Federal Budget of the Russian Federation to the Regional Budgets for the Support of Livestock Breeding" were amended in early 2015. The amendment includes key qualification requirements, published by the Russian Ministry of Agriculture in late 2014, as well as lists of breeding stock producers eligible for subsidies from the federal budget (including beef and dairy purebred breeding cattle operations and genetics producers). Moreover, in the spring of 2015, given the current economic situation in Russia, the Russian Ministry of Agriculture issued additional recommendations to support domestic producers of purebred breeding cattle. Unofficial translations of all of the aforementioned publications are contained herein.

## **General Information:**

On January 27, 2015, the Prime Minister of the Russian Federation, Dmitry Medvedev, signed Resolution No. 50 on amendments to the “Rules for Allocation and Distribution of Subsidies from the Federal Budget to Budgets of the Russian Federation Constituent Subjects (Provinces) for the Support of Livestock Breeding.” The Rules stipulated the procedures for the allocation and distribution of subsidies from the federal budget to the regional budgets of the Russian Federation for the support of livestock breeding, including:

- maintaining purebred breeding stock of beef and dairy cattle;
- maintaining sires of beef and dairy cattle breeds; and,
- purchasing (including via imports) genetic materials such as purebred young cattle, sires, semen and embryos to improve the milk and beef productivity.

The rules also contain the qualification requirements for Russian regions to participate in the program, formulas to calculate the amounts of the subsidies that will be distributed, and indicators to be taken into consideration by the Russian Ministry of Agriculture to evaluate the results and efficiency of regional programs (see Attachment 1 for an unofficial translation of Resolution No. 50 amending Russian Government Resolution No. 1257 of April 12, 2012).

Referenced within Resolution No. 50, the Russian Ministry of Agriculture approved and published key qualification requirements for agricultural establishments and private farms engaged in breeding livestock production to be included to the official list of subsidy recipients. The publication by the Ministry of Agriculture, in part, specifies the goals of the livestock breeding support program, and the qualification requirements (such as new breeding stock production and sales, as well as performance requirements for dairy and beef cattle, purebred swine, poultry, horses, sheep, and goats) (see Attachment 2 for an unofficial translation of the “Key Requirements Used in 2015 for Qualification of Agricultural Commodity Producers for the Allocation of Subsidies from the Federal Budget for Maintaining Breeding Livestock”).

The Ministry of Agriculture of the Russian Federation also published lists of agricultural establishments and private farms, which qualify for subsidies in 2015 for:

- the production of beef cattle breeding stock (see Attachment 3 for an unofficial translation);
- maintaining pedigree breeding beef and dairy bulls (sires) (see Attachment 4 for an unofficial translation); and,
- maintaining livestock breeding stock, excluding beef cattle (see Attachment 5 for an unofficial translation).

Lastly, in March 2015, the Russian Ministry of Agriculture issued additional recommendations to support domestic producers of purebred breeding cattle due to the economic downturn in Russia. Taking into consideration the cost of production, the Russian Ministry of Agriculture proposed support/subsidies of no less than 180 thousand rubles, which covers approximately 30 percent of the cost of production for one breeding bull (sire) over 16 months of age (see Attachment 6 for an unofficial translation).

GOVERNMENT OF THE RUSSIAN FEDERATION

RESOLUTION

January 27, 2015, No. 50

MOSCOW

**On amendments to the Rules for Allocation and Distribution of Subsidies from the Federal Budget  
to Budgets of the Russian Federation Constituent Subjects (Provinces) for the Support of  
Livestock Breeding**

The Government of the Russian Federation establishes hereby:

To approve proposed amendments to the Rules for Allocation and Distribution of Subsidies from the Federal Budget to Budgets of the Russian Federation Constituent Subjects (Provinces) for the Support of Livestock Breeding

approved by Resolution of the Government of the Russian Federation of 04.12.2012, No. 1257 “On Allocation and Distribution of Subsidies from the Federal Budget to Budgets of the Russian Federation Constituent Subjects (Provinces) for the Support of Livestock Breeding” (Collection of Legislative Acts of the Russian Federation, 2012, No. 50, Art. 7073).

Chairman of the Government of  
Russian Federation

D. Medvedev

Approved by  
RESOLUTION OF  
THE GOVERNMENT OF  
THE RUSSIAN FEDERATION  
dated January 27, 2015, No. 50

## AMENDMENTS

to be made to the to the Rules for Allocation and Distribution of Subsidies from the Federal Budget to Budgets of the Russian Federation Constituent Subjects (Provinces) for the Support of Livestock Breeding

The Rules for Allocation and Distribution of Subsidies from the Federal Budget to Budgets of the Russian Federation Constituent Subjects (Provinces) for the Support of Livestock Breeding shall be amended as follows:

Approved by  
RESOLUTION OF  
THE GOVERNMENT OF  
THE RUSSIAN FEDERATION  
dated December 04, 2012, No. 1257  
(as amended by  
RESOLUTION OF  
THE GOVERNMENT OF  
THE RUSSIAN FEDERATION  
dated January 27, 2015, No 50)

### **Rules for Allocation and Distribution of Subsidies from the Federal Budget to Budgets of the Russian Federation Constituent Subjects (Provinces) for the Support of Livestock Breeding**

1. These Rules establish the mode of allocation and distribution of subsidies from the federal budget to budgets of the Russian Federation (RF) Constituent Subjects (Provinces) for the support of livestock breeding, including breeding beef cattle (hereinafter – “subsidies”).
2. The subsidies are allocated with the aim of co-financing the execution of expenditure commitments of RF provinces related to the implementation of RF provincial state and/or municipal programs envisaging support for livestock breeding, including breeding beef cattle; the support is provided as allocation of funds to agricultural commodity producers, except citizens maintaining private household/backyard farms (hereinafter – “agricultural commodity producers”) for the support of livestock breeding, including breeding beef cattle (hereinafter – funds for the support of livestock breeding, state and/or municipal programs, respectively) in the following areas:
  - a) support for livestock breeding industry, including:
    - maintaining pedigree breeding stock, except breeding beef cattle;
    - maintaining sires of dairy cattle breeds - bulls over 16 months of age with proven high-quality off-spring or who’s offspring are undergoing quality assessment (hereinafter – “dairy sires”);
    - purchase (including via imports) of dairy sires improving the milk productivity. Dairy sires purchased through imports should have positive genomic evaluation;
    - purchase of pedigree young cattle of dairy breeds;
    - purchase of semen of dairy sires;
    - purchase (including via imports) of embryos of pedigree dairy cattle;
  - b) support for breeding beef cattle industry, including:

maintaining sires of beef cattle breeds - bulls over 16 months of age with proven high-quality off-spring or who's offspring are undergoing quality assessment (hereinafter – “beef sires”);  
purchase (including via imports) of beef sires improving the meat productivity. Beef sires purchased through imports should have positive genomic evaluation;  
purchase of pedigree young cattle of beef breeds;  
purchase of semen of beef sires;

3. Subsidies are allocated to budgets of the RF provinces satisfying one of the following requirements (criteria):

- a) breeding livestock herds included in the state breeding register that are owned by livestock breeding establishments should be available on the territory of RF province (hereinafter – breeding herds included in the state breeding registry);
- b) producers of agricultural commodities should have livestock population on the territory of RF province;

4. Conditions for subsidies allocation and their spending include:

- a) availability of the approved state and/or municipal programs envisaging measures in the areas specified in p.2 of these Rules;
- b) availability of the budgetary appropriations in the budget of RF province (local budget) for the execution of expenditure commitments of the RF province (municipal units) associated with the allocation of funds for the support of livestock breeding within the state and/or municipal programs;
- c) availability of the regulatory legal act of the RF province establishing mode and conditions of allocation of funds from the budget of the RF province to agricultural commodity producers for the support of livestock breeding industry, where subsidies are a source of financial assurance; the act should include a list of documents required for receiving the above funds and the period of their review of not more than 15 business days.

5. Funds for the support of livestock breeding industry are allocated at rates determined by the agency authorized by the supreme executive authority of the RF province (hereinafter – “authorized agency”) within the limits of funds envisaged for the RF province for the said goals:

- a) to agricultural commodity producers included in the list approvable by the Russian Ministry of Agriculture as advised by the supreme executive authorities of RF provinces – for maintaining population of pedigree breeding livestock at the rate “per conditional head” (in dairy and beef cattle farming – per cow from which a live calf was received in the reported fiscal year). Factors for the conversion of pedigree breeding livestock population into conditional heads are established by the Russian Ministry of Agriculture;
- b) to livestock artificial insemination establishments included in the list approvable by the Russian Ministry of Agriculture as advised by the supreme executive authorities of RF provinces – for maintaining cattle sires at the rate “per head”;
- c) to livestock artificial insemination establishments – for purchasing cattle sires from the breeding cattle herds included in the state breeding register as well as via imports – at the rate “per kg of live weight”;

- d) to agricultural commodity producers – for purchasing pedigree young dairy and beef cattle from the breeding cattle herds included in the state breeding register at the rate “per kg of live weight”;
- e) to livestock artificial insemination establishments – for purchasing semen of purebred cattle sires at the rate “per dose”;
- f) to livestock artificial insemination establishments included in the list approvable by the Russian Ministry of Agriculture – for the purchase (including via imports) of dairy cattle embryos at the rate “per piece.”

6. The amount of subsidy allocated to the budget of the i-th RF province for the support of livestock breeding industry, except breeding beef cattle, ( $W_i$ ) is calculated by the following formula:

$W_i = W_{1i} + W_{2i} + W_{3i} + W_{4i} + W_{5i} + W_{6i}$  , where:

$W_{1i}$  - the amount of subsidy allocated to the i-th RF province budget for the support of the population of pedigree breeding livestock, except the population of breeding beef cattle;

$W_{2i}$  - the amount of subsidy allocated to the i-th RF province budget for maintaining dairy sires;

$W_{3i}$  - the amount of subsidy allocated to the i-th RF province budget for purchasing (e.g. via imports) dairy sires which improve the milk productivity (dairy sires purchased via imports should have positive genomic evaluation);

$W_{4i}$  - the amount of subsidy allocated to the i-th RF province budget for purchasing pedigree young cattle of dairy breeds;

$W_{5i}$  - the amount of subsidy allocated to the i-th RF province budget for purchasing semen of dairy sires;

$W_{6i}$  - the amount of subsidy allocated to the i-th RF province budget for purchasing (e.g. via imports) embryos of pedigree dairy cattle.

7. The amount of subsidy allocated to the i-th RF province budget for maintaining the population of breeding livestock, except the population of breeding beef cattle ( $W_{1i}$ ) is calculated by the following formula (see page 6 of the Russian text), where:

$W$  - the amount of subsidy allocated for the support of livestock breeding industry, except beef cattle breeding in the relevant fiscal year;

$C_1$  – factor established by the Russian Ministry of Agriculture for determining the amount of subsidies allocated for maintaining the population of pedigree breeding livestock, except the population of breeding beef cattle, for the relevant fiscal year based on the share of budget appropriations provided for these goals;

$m$  – the number of RF constituent subjects (provinces) satisfying the requirements stipulated in p. 3 of these Rules;

$D_{1i}$  – portion made up by the conditional population of pedigree breeding livestock held by agricultural commodity producers in the i-th RF province, except the population of pedigree breeding beef cattle, within the total numbers of the conditional population of breeding livestock held by agricultural commodity producers, included in the list approvable by the Russian Ministry of Agriculture as advised by the supreme executive authorities of RF provinces, except the breeding beef cattle population, in the RF provinces meeting the requirements stipulated in p. 3 of these Rules;

$RBO_i$  – level of estimated fiscal capacity of the i-th RF province in the relevant fiscal year. It is calculated using the method of distribution of equalization transfers to RF provinces approved by

Resolution of the RF Government of November 22, 2004 No. 670 “On the distribution of equalization transfers to RF provinces.”

For calculating the amount of subsidies to be allocated in 2015, the levels of fiscal capacity of the Republic of Crimea and the Sevastopol City are taken to be equal to “one.”

8. The share of the conditional population of pedigree breeding livestock held by agricultural commodity producers in the i-th RF province (D1i) is determined on the basis of information provided to the Russian Agricultural Ministry by the authorized agency as of the beginning of the current fiscal year, using the following formula:

$D1i = Q1i / QRF$ , where:

Q1i – the conditional population numbers of pedigree breeding livestock held by agricultural commodity producers, included in the list approvable by the Russian Ministry of Agriculture as advised by the supreme executive authorities of RF provinces, except the breeding beef cattle population, in the i-th RF province;

QRF – the conditional population numbers of pedigree breeding livestock held by agricultural commodity producers, included in the list approvable by the Russian Ministry of Agriculture as advised by the supreme executive authorities of RF provinces, except the breeding beef cattle population, in the RF provinces meeting the requirements stipulated in p. 3 of these Rules;

9. The amount of subsidy to be allocated to the i-th RF province budget for maintaining dairy sires (W2i) is calculated by the following formula:

$$W_{2i} = W \times C_2 \times \frac{D_{2i} / PBO_i}{\sum_{i=1}^m \left( D_{2i} / PBO_i \right)},$$

where:

C2– factor established by the Russian Ministry of Agriculture for determining the amount of subsidies allocated for maintaining dairy sires for the relevant fiscal year based on the share of budget appropriations envisaged for these goals;

D2i – portion made up by dairy sires, held in the livestock artificial insemination establishments in the i-th RF province, within the total numbers of dairy sires held in the livestock artificial insemination establishments, included in the list approvable by the Russian Ministry of Agriculture as advised by the supreme executive authorities of RF provinces, in the RF provinces meeting the requirements stipulated in p. 3 of these Rules;

10. The portion made up by dairy sires, held in the livestock artificial insemination establishments in the i-th RF province, within the total numbers of dairy sires held in the livestock artificial insemination establishments, included in the list approvable by the Russian Ministry of Agriculture as advised by the supreme executive authorities of RF provinces, in the RF provinces meeting the

requirements stipulated in p. 3 of these Rules (D2i) is determined on the basis of information provided to the Russian Agricultural Ministry by the authorized agency at the beginning of the current fiscal year, using the following formula:

$D2i = Z_i / ZRF$ , where:

$Z_i$  - number of dairy sires held in the livestock artificial insemination establishments, included in the list approvable by the Russian Ministry of Agriculture as advised by the supreme executive authorities of RF provinces, in the i-th RF province;

$ZRF$  - number of dairy sires held in the livestock artificial insemination establishments, included in the list approvable by the Russian Ministry of Agriculture as advised by the supreme executive authorities of RF provinces, meeting the requirements stipulated in p. 3 of these Rules;

11. The rate of subsidy allocated to the i-th RF province budget for purchasing (e.g. via imports) dairy sires which improve the milk productivity (sires of dairy breeds purchased via imports should have positive genomic evaluation) ( $WZ3i$ ) is calculated by the following formula:

$$W_{3i} = W \times C_3 \times \frac{D_{3i} / PBO_i}{\sum_{i=1}^m (D_{3i} / PBO_i)},$$

where:

$C_3$  – factor established by the Russian Ministry of Agriculture for determining the amount of subsidies allocated for purchasing (e.g. via imports) dairy sires which improve the milk productivity (dairy sires purchased via imports should have positive genomic evaluation) for the relevant fiscal year based on the share of budget appropriations envisaged for these goals;

$D_{3i}$  – portion made up by dairy sires which improve the milk productivity (dairy sires purchased via imports should have positive genomic evaluation), in live weight, purchased (e.g. via imports) by the livestock artificial insemination establishments located in the i-th RF province, within the total population of dairy sires which improve the milk productivity (dairy sires purchased via imports should have positive genomic evaluation), in live weight, purchased (e.g. via imports) by the RF provincial livestock artificial insemination establishments, meeting the requirements stipulated in p. 3 of these Rules;

12. The portion of dairy sires which improve the milk productivity (dairy sires purchased via imports should have positive genomic evaluation), in live weight, purchased (e.g. via imports) by the livestock artificial insemination establishments located in the i-th RF province, within the total population of dairy sires which improve the milk productivity (dairy sires purchased via imports should have positive genomic evaluation), in live weight, purchased (e.g. via imports) by the RF provincial livestock

artificial insemination establishments, meeting the requirements stipulated in p. 3 of these Rules (D3i), is calculated on the basis of reported data on financial and economic performance of the agricultural commodity producers over the reported fiscal year by the following formula:

$D3i = R_i / RRF$ , where:

$R_i$  – the amount of dairy sires which improve the milk productivity (dairy sires purchased via imports should have positive genomic evaluation), in live weight, purchased (e.g. via imports) by the livestock artificial insemination establishments located in the i-th RF province;

$RRF$  – the amount of dairy sires which improve the milk productivity (dairy sires purchased via imports should have positive genomic evaluation), in live weight, purchased (e.g. via imports) by the RF provincial livestock artificial insemination establishments, meeting the requirements stipulated in p. 3 of these Rules.

13. The rate of subsidy allocated to the i-th RF province budget for purchasing pedigree young cattle of dairy breeds ( $W_{4i}$ ) is calculated by the following formula:

$$W_{4i} = W \times C_4 \times \frac{D_{4i} / PBO_i}{\sum_{i=1}^m (D_{4i} / PBO_i)},$$

where:

$C_4$  – factor established by the Russian Ministry of Agriculture for determining the amount of subsidies allocated for purchasing pedigree young cattle of dairy breeds for the relevant fiscal year based on the share of budget appropriations envisaged for these goals;

$D_{4i}$  – portion of the pedigree young cattle of dairy breeds, in live weight, purchased by the agricultural commodity producers of the i-th RF province, within the total amount of pedigree young cattle of dairy breeds, in live weight, purchased by the agricultural commodity producers, meeting the requirements stipulated in p. 3 of these Rules.

14. Portion of the pedigree young cattle of dairy breeds, in live weight, purchased by the agricultural commodity producers of the i-th RF province, within the total amount of pedigree young cattle of dairy breeds, in live weight, purchased by the agricultural commodity producers, meeting the requirements stipulated in p. 3 of these Rules ( $D_{4i}$ ), is calculated on the basis of reported data on financial and economic performance of the agricultural commodity producers over the reported fiscal year by the following formula:

$D_{4i} = M_i / MRF$ , where:

Mi – the amount of pedigree young cattle of dairy breeds, in live weight, purchased by the agricultural commodity producers of the i-th RF province;

MRF – the amount of pedigree young cattle of dairy breeds, in live weight, purchased by the agricultural commodity producers of RF provinces meeting the requirements stipulated in p. 3 of these Rules.

15. The rate of subsidy allocated to the i-th RF province budget for purchasing semen of dairy sires (W<sub>5i</sub>) is calculated by the following formula

$$W_{5i} = W \times C_5 \times \frac{D_{5i} / PBO_i}{\sum_{i=1}^m (D_{5i} / PBO_i)},$$

where

C<sub>5</sub> – factor established by the Russian Ministry of Agriculture for determining the amount of subsidies allocated for purchasing semen of dairy sires for the relevant fiscal year based on the share of budget appropriations envisaged for these goals;

D<sub>5i</sub> – portion of the semen of dairy sires purchased by the livestock artificial insemination establishments of the i-th RF province (in doses) within the total amount of semen of dairy sires, purchased by the livestock artificial insemination establishments of the RF provinces, meeting the requirements stipulated in p. 3 of these Rules (in doses).

16. Portion of the semen of dairy sires purchased by the livestock artificial insemination establishments of the i-th RF province (in doses) within the total amount of semen of dairy sires, purchased by the livestock artificial insemination establishments of the RF provinces, meeting the requirements stipulated in p. 3 of these Rules (in doses) (D<sub>5i</sub>) is calculated on the basis of reported data on financial and economic performance of the agricultural commodity producers over the reported fiscal year by the following formula:

$D_{5i} = V_i / VRF$ , where:

V<sub>i</sub> – the amount of semen of dairy sires purchased by the livestock artificial insemination establishments of the i-th RF province (in doses);

VRF – the amount of semen of dairy sires purchased by the livestock artificial insemination establishments of the RF provinces meeting the requirements stipulated in p. 3 of these Rules (in doses).

17. The rate of subsidy allocated to the i-th RF province budget for purchasing (e.g. via imports) embryos of pedigree dairy cattle (W<sub>6i</sub>) is calculated by the following formula :

$$W_{6i} = W \times C_6 \times \frac{D_{6i} / PBO_i}{\sum_{i=1}^m (D_{6i} / PBO_i)},$$

where

$C_6$  – factor established by the Russian Ministry of Agriculture for determining the amount of subsidies allocated for purchasing (e.g. via imports) embryos of pedigree dairy cattle for the relevant fiscal year based on the share of budget appropriations provided for these purposes;

$D_{6i}$  – portion of the embryos of pedigree dairy cattle purchased (e.g. via imports) by the livestock artificial insemination establishment of the  $i$ -th RF province (in pcs.) within the total amount of embryos of pedigree dairy cattle, purchased by the livestock artificial insemination establishments of the RF provinces, meeting the requirements stipulated in p. 3 of these Rules (in pcs.).

18. Portion of the embryos of pedigree dairy cattle purchased (e.g. via imports) by the livestock artificial insemination establishment of the  $i$ -th RF province (in pcs.) within the total amount of embryos of pedigree dairy cattle, purchased by the livestock artificial insemination establishments of the RF provinces, meeting the requirements stipulated in p. 3 of these Rules (in pcs.) ( $D_{6i}$ ) is calculated on the basis of reported data on financial and economic performance of the agricultural commodity producers over the reported fiscal year by the following formula:

$D_{6i} = E_i / ERF$ , where:

$E_i$  – amount of the embryos of pedigree dairy cattle purchased (e.g. via imports) by the livestock artificial insemination establishment of the  $i$ -th RF province (in pcs.);

$ERF$  – amount of the embryos of pedigree dairy cattle purchased (e.g. via imports) by the livestock artificial insemination establishments of the RF provinces, meeting the requirements stipulated in p. 3 of these Rules (in pcs.).

19. The overall sum of subsidy allocated to the  $i$ -th RF province budget for maintaining pedigree breeding population of beef cattle ( $V_i$ ) is calculated by the following formula:

$V_i = V_{1i} + V_{2i} + V_{3i} + V_{4i} + V_{5i} + V_{6i}$ , where:

$V_{1i}$  - the rate of subsidy allocated to the  $i$ -th RF province budget for maintaining the population of breeding beef cattle;

$V_{2i}$  - the rate of subsidy allocated to the  $i$ -th RF province budget for maintaining beef sires;

$V_{3i}$  - the rate of subsidy allocated to the  $i$ -th RF province budget for purchasing (e.g. via imports) beef sires which improve the meat productivity (beef sires purchased via imports should have positive genomic evaluation);

$V_{4i}$  - the rate of subsidy allocated to the  $i$ -th RF province budget for purchasing pedigree young cattle of beef breeds;

$V_{5i}$  - the rate of subsidy allocated to the  $i$ -th RF province budget for purchasing semen of beef sires.

20. The rate of subsidy allocated to the i-th RF province budget for maintaining the population of breeding beef cattle ( $V_{li}$ ) is calculated by the following formula:

$$V_{li} = V \times S_1 \times \frac{N_{li} / PBO_i}{\sum_{i=1}^z \left( N_{li} / PBO_i \right)},$$

where:

$V$  - amount of subsidies allocated for the support of breeding beef cattle in the relevant fiscal year;

$S_1$  – factor established by the Russian Ministry of Agriculture for determining the amount of subsidies allocated for maintaining the population of breeding beef cattle, for the relevant fiscal year based on the share of budget appropriations envisaged for these goals;

$z$  – number of RF constituent subjects (provinces) satisfying the requirements stipulated in p. 3 of these Rules;

$N_{li}$  – portion of the population of breeding beef cattle held by agricultural commodity producers in the i-th RF province, within the total numbers of breeding beef cattle held by agricultural commodity producers, included in the list approvable by the Russian Ministry of Agriculture as advised by the supreme executive authorities of RF provinces, in the RF provinces meeting the requirements stipulated in p. 3 of these Rules.

21. Portion of the population of breeding beef cattle held by agricultural commodity producers in the i-th RF province, within the total numbers of breeding beef cattle held by agricultural commodity producers, included in the list approvable by the Russian Ministry of Agriculture as advised by the supreme executive authorities of RF provinces, in the RF provinces meeting the requirements stipulated in p. 3 of these Rules ( $N_{li}$ ), is determined on the basis of information provided to the Russian Ministry of Agriculture by the authorized agency at the beginning of current fiscal year, using the following formula:

$N_{li} = Li / LRF$ , where:

$Li$  – the population of breeding beef cattle held by agricultural commodity producers included in the list approvable by the Russian Ministry of Agriculture as advised by the supreme executive authorities of RF provinces, in the i-th RF province;

$LRF$  – the population of breeding beef cattle held by agricultural commodity producers included in the list approvable by the Russian Ministry of Agriculture as advised by the supreme executive authorities of RF provinces in the RF provinces meeting the requirements stipulated in p. 3 of these Rules.

22. The rate of subsidy allocated to the i-th RF province budget for maintaining beef sires ( $V_{2i}$ ) is calculated by the following formula

$$V_{2i} = V \times S_2 \times \frac{N_{2i} / PBO_i}{\sum_{i=1}^z \left( N_{2i} / PBO_i \right)},$$

where:

$S_2$  – factor established by the Russian Ministry of Agriculture for determining the amount of subsidies allocated for maintaining beef sires, for the relevant fiscal year based on the share of budget appropriations envisaged for these goals;

$N_{2i}$  – portion of the beef sires held by the livestock artificial insemination establishment in the  $i$ -th RF province within the total numbers of beef sires held in the livestock artificial insemination establishments, included in the list approvable by the Russian Ministry of Agriculture as advised by the supreme executive authorities of RF provinces, in the RF provinces meeting the requirements stipulated in p. 3 of these Rules.

23. Portion of the beef sires held by the livestock artificial insemination establishment in the  $i$ -th RF province within the total numbers of beef sires held in the livestock artificial insemination establishments, included in the list approvable by the Russian Ministry of Agriculture as advised by the supreme executive authorities of RF provinces, in the RF provinces meeting the requirements stipulated in p. 3 of these Rules ( $N_{2i}$ ), is determined on the basis of information provided to the Russian Ministry of Agriculture by the authorized agency at the beginning of the current fiscal year, using the following formula:

$N_{2i} = O_i / ORF$ , where:

$O_i$  – number of the beef sires held by the livestock artificial insemination establishments included in the list approvable by the Russian Ministry of Agriculture as advised by the supreme executive authorities of RF provinces, in the  $i$ -th RF province;

$ORF$  – number of the beef sires in the livestock artificial insemination establishments included in the list approvable by the Russian Ministry of Agriculture as advised by the supreme executive authorities of RF provinces, in the RF provinces meeting the requirements stipulated in p. 3 of these Rules.

24. The rate of subsidy allocated to the  $i$ -th RF province budget for purchasing (e.g. via imports) beef sires which improve the meat productivity (sires of beef breeds purchased via imports should have positive genomic evaluation) ( $V_{3i}$ ) is determined by the following formula:

$$V_{3i} = V \times S_3 \times \frac{N_{3i} / PBO_i}{\sum_{i=1}^z \left( N_{3i} / PBO_i \right)},$$

where:

S3 – factor established by the Russian Ministry of Agriculture for determining the amount of subsidies allocated for purchasing (e.g. via imports) beef sires which improve the meat productivity (sires of beef breeds purchased via imports should have positive genomic evaluation) for the relevant fiscal year based on the share of budget appropriations envisaged for these goals;

N3i – portion of beef sires, in live weight, purchased (e.g. via imports) by the livestock artificial insemination establishments in the i-th RF province within the total numbers of beef sires which improve the meat productivity (sires of beef breeds purchased via imports should have positive genomic evaluation), in live weight, purchased by the agricultural commodity producers of the RF provinces, meeting the requirements stipulated in p. 3 of these Rules.

25. Portion of beef sires, in live weight, purchased (e.g. via imports) by the livestock artificial insemination establishments in the i-th RF province within the total numbers of beef sires which improve the meat productivity (sires of beef breeds purchased via imports should have positive genomic evaluation), in live weight, purchased by the agricultural commodity producers of the RF provinces, meeting the requirements stipulated in p. 3 of these Rules (N3i), is determined on the basis of reported data on financial and economic performance of the agricultural commodity producers over the reported fiscal year by the following formula:

$N3i = Ri / RRF$ , where:

Oi – amount of beef sires, in live weight, purchased by the livestock artificial insemination establishments of the i-th RF province;

RRF – amount of beef sires, in live weight, purchased (e.g. via imports) by the livestock artificial insemination establishments of RF provinces in the reported fiscal year which improve the meat productivity (beef sires purchased via imports should have positive genomic evaluation).

26. The rate of subsidy allocated to the i-th RF province budget for purchasing pedigree young cattle of beef breeds ( $V_{4i}$ ) is calculated by the following formula:

$$V_{4i} = V \times S_4 \times \frac{N_{4i} / PBO_i}{\sum_{i=1}^z \left( N_{4i} / PBO_i \right)},$$

where:

$S_4$  – factor established by the Russian Ministry of Agriculture for determining the amount of subsidies allocated for purchasing pedigree young cattle of beef breeds for the relevant fiscal year based on the share of budget appropriations envisaged for these goals;

$N_{4i}$  – portion of the pedigree young cattle of beef breeds, in live weight, purchased by the agricultural commodity producers of the i-th RF province, within the total amount of pedigree young cattle of dairy breeds, in live weight, purchased by the agricultural commodity producers, meeting the requirements stipulated in p. 3 of these Rules.

27. Portion of the pedigree young cattle of beef breeds, in live weight, purchased by the agricultural commodity producers of the i-th RF province, within the total amount of pedigree young cattle of beef breeds in live weight, purchased by the agricultural commodity producers, meeting the requirements stipulated in p. 3 of these Rules ( $N_{4i}$ ), is calculated on the basis of reported data on financial and economic performance of the agricultural commodity producers according to the format approved by the Russian Ministry of Agriculture, over the reported fiscal year by the following formula:

$N_{4i} = T_i / TRF$ , where:

$T_i$  – the amount of pedigree young cattle of beef breeds, in live weight, purchased by the agricultural commodity producers of the i-th RF province;

$TRF$  – the amount of pedigree young cattle of beef breeds, in live weight, purchased by the agricultural commodity producers of RF provinces meeting the requirements stipulated in p. 3 of these Rules.

28. The rate of subsidy allocated to the i-th RF province budget for purchasing semen of beef sires ( $V_{5i}$ ) is calculated by the following formula:

$$V_{5i} = V \times S_5 \times \frac{N_{5i} / PBO_i}{\sum_{i=1}^z \left( N_{5i} / PBO_i \right)},$$

where:

S5 – factor established by the Russian Ministry of Agriculture for determining the amount of subsidies allocated for purchasing semen of beef sires for the relevant fiscal year based on the share of budget appropriations envisaged for these goals;

N5i – portion of semen of beef sires purchased by the livestock artificial insemination establishments of the i-th RF province (in doses), within the total amount of semen of beef sires, purchased by the livestock artificial insemination establishments of the RF provinces, meeting the requirements stipulated in p. 3 of these Rules (in doses).

29. Portion of semen of beef sires purchased by the livestock artificial insemination establishments of the i-th RF province (in doses), within the total amount of semen of beef sires, purchased by the livestock artificial insemination establishments of the RF provinces, meeting the requirements stipulated in p. 3 of these Rules (in doses) (N5i) is determined on the basis of reported data on financial and economic performance of the agricultural commodity producers over the reported fiscal year by the following formula:

$N5i = Fi / FRF$ , where:

Fi – the amount of semen of beef sires purchased by the livestock artificial insemination establishments of the i-th RF province (in doses);

FRF – the amount of semen of beef sires purchased by the livestock artificial insemination establishments purchased by the agricultural commodity producers of the RF provinces meeting the requirements stipulated in p. 3 of these Rules (in doses).

30. The distribution of subsidies to the RF province budgets is established by the federal law on federal budget for the relevant fiscal year and the planned period and/or the enactment of the RF Government adopted in accordance with the above law.

In case when in the current fiscal year the budget appropriations for the execution of expenditure commitments envisaged in p.2 of these Rules are increased, the rate of subsidy allocated to the RF i-th province budget is calculated on the basis of data applied for calculating the subsidy rate in accordance with p.p. 6-29 of these Rules for the current fiscal year.

31. The amount of budget appropriations for the RF province budget for the execution of RF provincial expenditure commitment which is co-financed by subsidy shall be approved by the RF province law on the RF province budget based on the requirement for achieving effectiveness indicators of using the subsidies, as established in the agreement on subsidy allocation concluded by the Russian Agricultural Ministry and the supreme executive authority of the RF province (hereinafter – the “agreement”), but not less than in the amount established for the RF province as a level of co-financing of the expenditure commitment at the expense of the federal budget funds.

32. Co-financing level of the RF province expenditure commitment for which subsidy (Yi) serves as a source of financial assurance is calculated by the following formula:

$Yi = 0.7 / RBOi$ , where:

0.7 – average co-financing level

Co-financing level of the RF province expenditure commitment cannot be established at the rate above 95% and below 70% of the expenditure commitment.

Co-financing level by RF province is approved by the Russian Ministry of Agriculture for the relevant fiscal year.

33. Subsidies are allocated on the basis of agreement.

Form of the agreement is approved by the Russian Ministry of Agriculture in compliance with the provisions set forth in Resolution of the RF Government of September 30, 2014 No. 999 “On the Generation, Allocation and Distribution of Subsidies from the Federal Budget to RF province budgets.”

34. Subsidies are transferred according to the established procedure to the bank accounts of regional agencies of the Federal Treasury opened for accounting transfers and their distribution among the budgets of the RF budgetary system, followed by re-transfer, pursuant to the established procedure, to the budgets of RF provinces.

In case where the Russian Ministry of Agriculture decides to delegate its powers on receiving federal budget funds for the subsidy transfers to a regional agency of the Federal Treasury, the subsidies will be transferred to bank accounts of the regional agencies of the Federal Treasury opened for keeping records of transactions with funds assigned to the budgets of RF provinces pursuant to the procedure established by the Federal Treasury.

35. The authorized agency shall submit the following documents to the Russian Ministry of Agriculture:

- a) extract from the RF province law on the RF province budget and/or regulatory legal acts of municipal units on the local budgets which prove that the RF province budget (local budget) has budget appropriations for the execution of expenditure commitments (see p. 2 of these Rules) of the RF province (municipal unit) in due time established by the Russian Ministry of Agriculture;
- b) report on spending of the RF province budget (local budget) for which subsidy serves as a source of financial assurance, according to the format and within the deadline established by the Russian Ministry of Agriculture;
- c) report on the achievement of values of the performance indicators in the use of subsidies given in the agreement; the report shall be developed according to the format and within the deadline established by the Russian Ministry of Agriculture;
- d) report on financial and economic performance of the agricultural commodity producers; the report shall be developed according to the format and within the deadline established by the Russian Ministry of Agriculture.

36. In case where the amount of budgetary appropriations envisaged in the RF province budget for the support of livestock breeding industry, including breeding beef cattle, cannot ensure the level of co-financing established for the RF province, the amount of subsidy allocated to the RF province budget

shall be reduced with the aim of reaching an appropriate co-financing level, and the released budgetary appropriations are re-distributed among budgets of other RF provinces entitled for receiving subsidies.

37. In case where in the current fiscal year a RF province does not require a subsidy, the non-used subsidy shall, upon written request of the authorized agency, be re-distributed among budgets of other RF provinces entitled for receiving subsidies in accordance with these Rules.

38. The effectiveness of spending of the RF province budgets for which subsidies serve as a source of financial assurance shall be evaluated annually by the Russian Ministry of Agriculture based on the achievement of the following performance indicators of the subsidy use:

- a) the population of high-quality breeding livestock, except the population of breeding beef cattle, in the agricultural establishments and private farms, including individual entrepreneurs (thousand head);
- b) the population of high-quality breeding beef cattle, in the agricultural establishments and private farms, including individual entrepreneurs (thousand head);

39. Provisions concerning the procedure of money repayment by RF provinces in case of violation of the commitments envisaged in the agreement pertaining to the accomplishment and/or achievement of the performance indicators in using subsidies, including the procedure for calculating amount of funds to be repaid; time period of repayment; reasons for the exemption of RF provinces from the application of responsibilities for the infringement of the commitments envisaged in the agreement; and, the procedure of using the returned funds by the federal budget treasurer, shall be used pursuant to Resolution of the RF Government from September 30, 2014, #999 “On the Generation, Allocation and Distribution of Subsidies from the Federal Budget to RF province budgets.”

40. In case where the agreement is not available as of March 01 of the current fiscal year, subsidy of the relevant RF province approved by the federal law on the federal budget for the relevant fiscal year and the planned period an/or by the RF Government act, will be re-distributed among budgets of other RF provinces entitled for receiving subsidies in accordance with these Rules, and/or for other measures of the State Program for the Development of Agriculture and the Regulation of Markets of Agricultural Commodities, Raw Materials and Food Products for 2013-2020, approved by Resolution of the RF Government No. 717, dated July 14, 2012 “On the State Program for the Development of Agriculture and the Regulation of Markets of Agricultural Commodities, Raw Materials and Food Products for 2013-2020.”

Decision on the distribution and re-distribution of budgetary appropriations of the federal budget for the allocation of subsidies are not made in case where agreements were not concluded due to the occurrence of the force-majeure circumstances.

41. The residual amount of subsidy generated in accordance with p.p. 36, 37, 39 and 40 of these Rules is re-distributed among budgets of the RF provinces upon decision of the Russian Agricultural Ministry based on written requests submitted to the Ministry by the authorized agencies concerning an increase of annual amount of the assigned subsidies proportionally to the share of additional requirement of the RF province for subsidy within the total amount of additional requirements of RF provinces in subsidies with consideration given to the actual spending of funds over the reported period.

The redistribution of subsidies among the budgets of RF provinces is established by the federal law on the federal budget for the relevant fiscal year and the planned period and/or act of the RF Government adopted pursuant to the above law.

42. Transactions on cash disbursements of the RF province budgets (local budgets) for which subsidies serve as a source of financial assurance, including their residual amount, not used by January 01 of the current year, are conducted considering special provisions established by the federal law on the federal budget for the relevant fiscal year and the planned period.

43. The amount of subsidies not used by January 01 of the current fiscal year should be returned to the federal budget by the local authorities of RF provinces that are responsible, in compliance with the legislative and other regulatory legal acts, for the repayment of remaining subsidies from the assigned revenue sources of the RF province budget, in line with the requirements established by the Budget Code of the Russian Federation and the federal law on the federal budget for the relevant fiscal year and the planned period.

Based on the Russian Agricultural Ministry decision concerning the existing requirement for subsidies that had not been used by January 01 of the current fiscal year, the budgetary expenditures of the RF province meeting the goals of subsidy allocations, might be increased pursuant to the established procedures by amounts not exceeding the subsidy residue.

In case where a non-used subsidy residue was not transferred to the federal budget income, the above funds shall be subject to collection to the federal budget income pursuant to the procedure established by the Russian Ministry of Finance.

44. In case where the authorized agency fails to comply with the requirements for subsidy allocations, the relevant information is communicated by the Russian Agricultural Ministry to the Russian Ministry of Finance with a proposal to suspend the allocation of subsidies for making an appropriate decision pursuant to the procedure established by the Russian Ministry of Finance.

45. In case where the subsidy is used inappropriately and/or the RF province fails to comply with the requirements for its allocation, fiscal enforcement measures will be applied as envisaged by the budget legislation of the Russian Federation.

Decisions on suspending transfers (reduction of amount) of the subsidy are not made, if the requirements for subsidy allocation were not fulfilled due to the force-majeure circumstances.

46. Responsibility for the credibility of data provided to the Russian Agricultural Ministry and the observance of the requirements set forth in the Rules and the agreement, is imposed on the authorized agencies.

In case of failure to comply with the requirements established by the agreement and these Rules, the relevant funds will be subject to collection to the federal budget income in accordance with the budget legislation of the Russian Federation.

47. Oversight of compliance with the subsidy allocation requirements by RF provinces is conducted by the Russian Ministry of Agriculture and the Federal Service for Financial and Budget Supervision.

***END UNOFFICIAL TRANSLATION***

## **ATTACHMENT 2**

### ***BEGIN UNOFFICIAL TRANSLATION***

Approved by  
Russian Ministry of Agriculture  
Dated: December 23, 2014.

### **Key Requirements**

#### **Used in 2015 for Qualification of Agricultural Commodity Producers for the Allocation of Subsidies from the Federal Budget for Maintaining Breeding Livestock**

1. In accordance with RF Government Resolution No. 1257 of 04.12.2012, the Russian Ministry of Agriculture approves hereby a List of Agricultural Establishments and Private Farms Involved in Breeding Livestock Sector for the Allocation of Subsidies to the RF Constituents (Provinces) for the Support of Livestock Breeding (hereinafter – the “List”).
2. Livestock breeding establishments shall be included in the List with the following goals:  
encourage selection and breeding activity meant to reach up-to-date high-tech selection accomplishments in livestock raising;  
encourage production of high-quality livestock breeding material (products) and increase its competitiveness at the world market;  
maintain the most valuable for domestic industry livestock species and breeds whose numbers are declining or low.
3. Livestock breeding establishments included in the List shall meet the following requirements:
  - a) hold certificate on registration with the State Breeding Register issued by the Russian Ministry of Agriculture pursuant to the established procedure.  
Livestock breeding establishments included for the first time in the State breeding register are added to the List after the expiry of a calendar year from the date of their registration with the above register as well as upon decision of the commission.  
Selection and genetic centers, breeding ranches are considered on a priority basis for putting on the List.
  - b) ensure the necessary level of livestock reproduction and marketing of the super-replacement breeding young animals based on the following indicators:  
Young stock production shall not be less than:
    - dairy cattle farming: 80 calves per 100 cows (calf crop reduction to 76 is allowed in the herds with an average cow productivity at 7000 kg of milk and above);
    - beef cattle farming: 82 calves per 100 cows;
    - horse farming: 67 colts per 100 mares;
    - sheep and goat farming: 90 lambs/yeanelings per 100 female sheep/goats;
    - pig farming: 11 piglets per farrow per sow (at least 1.9 farrows per year).Sales of young animals satisfying the requirements of breed standards, not less than:
    - dairy and beef cattle farming – 10 heads per 100 cows available at the beginning of year (including at least 7 head of breeding population).Increase in the numbers of cattle breeding stock in the herd is equated with the sales volume of young breeding animals in the same values;

- pig farming – 10 head of young breeding stock or young animals originated from purebred crossing of the animals satisfying the requirements for breed standard and productivity rate, per 100 head of received pig crop;

- horse farming – 15 head per 100 mares;

- sheep farming – 10 head per 100 ewes;

- poultry farming: egg fowls – 35% of products; fowls for egg and meat production - 40%, fowls for meat production – 60 %, guinea fowl farming - 40%;

c) have plans (programs) for selection and breeding activity developed by the industry-specific research institutes and educational research institutions or coordinated with the above institutes/institutions;

d) ensure sustainable numbers of pedigree breeding livestock in the agricultural establishments not affected by emergency situations;

e) achieve dairy cattle productivity:

- herd-average productivity – at least 5000 kg of milk per head for high-yield breeds (see Appendix) and not less than 4000 kg for other breeds;

- herd-average productivity in the agricultural establishments affected by emergency situations – at least 4500 kg of milk per head.

For the agricultural establishments located in the Far North regions and equated localities as well as for the establishments raising dairy cattle breeds that represent the bovine gene pool, the minimal requirements for milk productivity are not established.

e) make arrangements for automated record keeping of origin, productivity, reproduction and assessment of animal breeding value via the use of automated management system for the selection and breeding activity;

f) ensure identification of breeding livestock population and its registration with the automated management system for the selection and breeding activity;

g) attend livestock exhibitions, broods and auctions (upon request of the Department of Livestock Farming and Breeding of the Russian Agricultural Ministry);

h) ensure veterinary safety of the establishments.

4. The following reasons provide basis for rejection from adding to the List:

- non-conformity to the above requirements;

- expired period of validity of the certificate on registration with the State Breeding Register;

- recognition of insolvency and/or application of bankruptcy procedure to the entity;

- inappropriate and inefficient use of the budget funds allocated earlier.

5. The List is compiled and amended as advised by the local state authorities of RF provinces in the area of livestock breeding.

## Appendix #1 to the Key Requirements

### High-yield dairy cattle breeds

1. Ayrshire
2. Holstein
3. Jersey
4. Montbeliarde
5. Red and white
6. Kostroma
7. Simmental
8. Kholmogory
9. Black and white
10. Yaroslavl

## Appendix #2 to the Key Requirements

### № Breeds and categories

#### Local horse breeds

- 1 Altay
- 2 Bashkir
- 3 Buryat
- 4 Upper Yenisei
- 5 Vyatka
- 6 Zabaikal
- 7 Kazakh
- 8 Kalmyk
- 9 Kuznets
- 10 Kushum
- 11 Megejenskaya
- 12 Mezenskaya
- 13 Novoaltaiskaya
- 14 Pechorskaya
- 15 Prilenskaya
- 16 Priobskaya
- 17 Tuvinskaya
- 18 Chumysh
- 19 Yakut

#### Commercial horse breeds

- 1 American miniature
- 2 Budennovskaya
- 3 Hungarian
- 4 Vladimirskaya
- 5 Hanoverian

- 6 Donskaya
- 7 Kabardin
- 8 Karachev
- 9 Lithuanian Heavy Draft
- 10 Percheron
- 11 Russian Saddle
- 12 Russian Heavy Draft
- 13 Soviet Heavy Draft
- 14 Tersk
- 15 Tori
- 16 Trakehner
- 17 Ukrainian Saddle
- 18 Shetland pony

Commercial horse breeds tested on hippodromes

- 1 American trotting
- 2 Arabian purebred
- 3 Akhaltekin
- 4 Orlov trotter
- 5 Russian trotter
- 6 French trotter
- 7 Thoroughbred saddle

RF Province

Agribusiness (APC) Management Agency

Top Manager

(according to the list)

Subject: on the distribution of subsidies

Resolution of the Government of the Russian Federation of December 04, 2012, No. 1257 has envisaged the state support from the federal budget to constituent subjects (provinces) of the Russian Federation, including livestock artificial insemination organizations, for maintaining dairy and beef cattle sires.

With consideration of increased costs of maintaining dairy and beef cattle sires due to the implementation of expensive selection measures, in the process of estimation of the total amount of federal funds by area of the state support, namely – for maintaining of one breeding bull (sire) over 16 months of age, with proven high-quality off-spring or who's offspring are undergoing quality assessment, the estimated rate of subsidies within the Russian Federation is 180.0 thousand rubles per head, which makes up approx. 30% of its maintaining costs.

Based on the above, in 2015 we advise to establish the rate of subsidies from the federal budget for maintaining dairy and beef sires at no less than 180.0 thousand rubles per head.

Director
